

Janyre's 75 Secret Search Words

Start by doing a global search for every single one of these words. Yes, every single one. You'll be shocked (and, if you're like me, horrified) by how many times you use these words without knowing you're doing it.

The point isn't necessarily to get rid of all of them, though you can probably delete the vast majority. The idea is to be purposeful in your use of words. Eventually you'll be able to whittle this list down to your own personal favorites.

Happy hunting!
